Fardin Khan

778-551-2510   f2k5.github.io   fardin.khan.cs@gmail.com

SKILLS:

Python, Java, C, SQL, Swift, JavaScript, HTML, CSS, Xcode, Unix, git

VOLUNTEER WORK:

Course Representative, CSC 361 — 2020

As course representative for the networking course CSC 361, I took feedback from other students via email or in person and provided those feedback to the course instructor. Attended meetings with the instructor and TA's to improve the course.

ACADEMIC PROJECTS:

SENG 265, Software Development Methods

Built a text formatter in **C** and an advanced text formatter in **Python**.

Implemented run length encoding using dynamic memory in **C**.

https://github.com/f2k5/Software-Development-SENG-265

PERSONAL PROJECTS:

Password Generator iOS app

An iOS app built in **Swift** that generates random passwords for users.

https://github.com/f2k5/Password-Generator

Number Guessing Game

A game built in **JavaScript** that asks the player to guess the number the computer is thinking.

https://github.com/f2k5/Number-Guessing-Game

Portfolio

My personal portfolio made with **HTML** and **CSS**.

https://github.com/f2k5/f2k5.github.io

EDUCATION:

University of Victoria - BSc **Computer Science**, Bachelor of Science

2016 - 2020
